

EFFORTS MADE IN THE FIELD OF ENVIRONMENT EDUCATION

At our school, we are committed to creating environmentally responsible citizens through various curricular and co-curricular initiatives. Environmental education is integrated into subjects like Science, Social Science, and EVS as per NCERT/CBSE guidelines, and students from Class I to XII are sensitized about conservation, pollution, biodiversity, and sustainable development. Our active Eco Club regularly conducts activities such as tree plantation drives, World Environment Day celebrations, No Plastic Campaigns, and Energy Conservation drives. The school has Vegetable Garden maintained by students, also Waste Segregation systems to promote practical learning. We also observe Earth Day, Ozone Day, and Wildlife Week. Students are encouraged to participate in composting, paper recycling, and maintaining bird feeders to develop a sense of responsibility towards nature. Through these continuous efforts, we aim to instil values of environmental protection and sustainable living in every child.
