VISION

That our students will show the way, embody truth and live to be global citizens

MISSION

To provide quality education through Christian ethos, enable our students to realize their full potential and train them to lead a happy student life.

OUR OBJECTIVES

Learning should be fun!

A sound mind in a sound body has been the eternal quest of every seeker of the elixir of life. Here at VPS, learning is never seen as a burden on the students psyche. We teach the fun way of learning, particularly in the lower classes.

No doubt, technology has made life complex for everyone these days. It calls for new perceptions and adjustments to the environment. Pupils are trained to make necessary adjustments smoothly and effortlessly.

The VPS saga of excellence

VPS came on the scene in June 1998; since then it has been preparing students for the rat race of life in the fast lane. Much has changed in the last few years. Our basic educational principles, however, have not changed. To make a qualitative change in the lives of our students is what motivates the management and staff here. The school boasts modern facilities to provide for a comprehensive curriculum suitable for all abilities and interests. Excellence is encouraged and valued. While academically gifted students are challenged to reach their full potential, all ability levels are catered for, supported and attended to.

The Academic Programme:

Kindergarten is the first step in the journey of education for young children. Here learning happens through repetition, picture reading, imitation and expression.

Students in the higher classes have to follow syllabus as prescribed by the CBSE.

The syllabus for the **Primary Section** (Classes I-V) includes such diverse subjects as the three languages, Mathematics, Environmental Studies, Social Science, Work Experience, Art Education and Physical Education.

At the **Middle School** level (Classes VI-VIII), the subjects taught are no different from the LP syllabus, albeit at a higher level of treatment.

At the **Secondary Level** (Classes IX-X), while English is mandatory, the second language can be either Malayalam or Hindi.

The **Senior Secondary** students (Classes XI-XII) have option to choose between science and commerce streams.

Do you have a dream for your child? Then we have a plan for you.....

Laboratories: Learning by doing...

The school has well-equipped, functional laboratories for physics, chemistry and biology to conduct experiments, demonstrations and project works. Students are encouraged to undertake projects and experiments on their own under the teachers' supervision.

Trained instructors demonstrate to the Students how to meet future challenges in the field of information technology. Students develop the capability to analyse future advances and to enhance creativity.

Co-curricular Activities:

The extra dimensions of learning...

Soaring out of the boundaries set by the academic curriculum, co-curricular activities provide the platform for the expression and expansion of students' inborn talents. Here what spurs the participants is not the fear of failure in examinations but the inner drive to identify and excel in one's God-given talents and skills. Activities like drama, dance, debates, public speaking and tournaments of various kinds are open to VPS students at every turn.

These displayed through performances, competitions and exhibitions, promote qualities of self-reliance, initiative, cooperation, confidence, and the capacity to deal with emotional challenges.

Physical Education

Nurturing the sporting spirit.. Well-maintained playgrounds for sports and games like football, basketball, badminton, cricket, horse riding, swimming and shooting are provided to develop sporting skills and general fitness. While the thrill of competition and victory is an important part of any sport, our primary goal is to encourage participation, to accept victory and loss with equanimity, to maintain a life-long interest in physical fitness, to develop skills and to take pride in having done one's best.

Do you have a dream for your child? Then we have a plan for you.....
